

Maussafty

Maus brand introduction

Maus is a Swedish award winning based company. Their roots run deep in the innovation area, they are using self developed technology, that moves the industry into a smarter and more modern era.

Used where it matters

Maus is used both in the professional firefighting industry and the the private sector. a good example is that you will find a Maus Xtin in every ambulance in Sweden, or in every Postnord car.

Maus I Xtin Klein

Maus Xtin Klein

The future is here, small compact and user friendly.

The Xtin Klein is a perfect fit in the **home, Office** & on the **road**.

The special gas combination puts out the fire in no time, and it doesn't destroy your property while doing it. The gas is harmless for Humans & Animals.

Xtin klein key selling points

- Small & powerful
- Uses gas, no foam
- Kids can use it
- Safety made easy
- Save for the environment

Maus I stixx pro - Automatic fire protection

Maus Stixx Pro

The power cabinet is where a fire is most likely to burst out. With the Stixx Pro you can have a peace of mind.

It self activate at 180 degrees, and will put out the fire before it can spread to the rest of the house. The product is approved to be used against electrical fires.

Stixx Pro key selling points

- Self activated
- No wires needed
- No maintenance
- Environment friendly
- Small and powerful

2022

PRODUCTS

LAUNCHED!

MAUS GRANATE

With the fire suppression grenade you will protect 150 m³.

Perfect for first responders, police, ambulance, production facilities etc.

Dafgårds have purchased MAUS Granate 150 for their rescue vehicles.

2022

PRODUCTS

EGO SERIES

EGO can protect spaces up to 500 m³. What do you have to do? Nothing – if you got an EGO.

Fire Suppression System for boats, vehicles, production facilities and server rooms.

194mm (L) x 186mm (W) x 282mm (H)

EGO Blast Series

EGO Blast can protect spaces from 0,6 m³ to 1600 m³. The Potassium mix inside the EGO Blast series is unique. It does not cause any residues, it extinguishes the fire with aerosol (white smoke) and as long as the aerosol floats in the space the fire will not re-ignite. **Holy Smoke!**

EGO Blast 100 & 150 EGO Blast 150 is the largest unit in the series that can by itself protect spaces up to 15 m³. The unit has a built in activation control with self-check button and several connections to connect it to other units from the EGO Blast Series, to the EGO Kegel or directly to a linear heat detection cable. The EGO Blast 100 has the same size, but has only 6 cartridges instead of 9 (EGO Blast 150), and can protect spaces up to 10 m³ by itself.

EGO Blast 6 is the smallest unit in the EGO Blast Series. It can by itself protect spaces up to 0,6 m³.

58 x 55 x 104 mm

58 x 55 x 1072 mm

EGO Blast 15 is the big brother of EGO Blast 6 and together they can protect areas where space is an issue. It can by itself protect spaces up to 1,5 m³. Connect it to EGO Kegel or EGO Kontrol.

EGO Kegel

EGO Kegel is a Thermal Activation Generator which can detect fires and activate the EGO Blast Series. It does not need electricity or batteries. It uses electromagnetic induction to generate electrical current. Depending on the thermal bubble it can detect heat in 57°C, 68°C, 79°C, 93°C, 141°C, 182°C och 260°C. It can also provide an output signal to shut down the electric system or start an alarm.

Ø65mm, H 100mm

EGO Kegel shall be installed according to the image above with EGO Blast units installed in a row.

EGO Kontrol

58 x 54 x 104 mm

EGO Kontrol
EGO Kontrol can be used with conventional gas fire suppression systems, with linear heat detecting cables and with EGO Kegel. EGO Kontrol is a link between different types of suppression systems and heat detecting devices.

MAUS is a registered brand owned by Falkenstein Invest AG.
