

Fully - electronic weighing truck
With waterproof stainless steel indicator.
Painted box truck

Fully - electronic weighing truck
With waterproof stainless steel indicator.
Stainless steel box truck

Due to a large number of requests from industrial and agricultural customers, who required a transportable truck with inbuilt weighing facility, Bjerringbro Vægte have developed the Weighing truck. The Weighing truck is suited to many situations on a farm and on the factory floor, among others the weighing of feeds combined with weighing of piglets at weaning time. In industry the need is for a combined component transporter and weigher.

The weighing truck can be supplied with a number of container sizes, 200 300 and 400 litres. We can also mount the weigher on pneumatic tyres or solid rubber. The numerous possibilities include removable hatch, and single rear wheel giving an extremely small turning radius. All movable parts are in sealed bearings while the chassis is hot dip galvanized. We can supply the appliance with either mechanical or electronic readout as required.

WEIGHING TRUCK

Model	Container sizes			Total weight
	Length	Width	Height	
200 litre	122 cm	55 cm	82 cm	65 kg
300 litre	116 cm	66 cm	102 cm	70 kg
400 litre	142 cm	66 cm	102 cm	80 kg

Fully - electronic	Capacity 250 kg* <small>* the capacity can be changed.</small>	Division 0,1 kg
