

BIKE PROTECT BIO

Special preservation spray

Description

Ideal for protecting all types of bicycle (such as mountain bikes, trekking bikes, e-bikes, racing bikes, etc.) when they are not being used for long periods. BIKE PROTECT BIO maintains, preserves and protects surfaces against dust and dirt. It repels moisture and the fine oil film protects the treated surfaces against corrosion. BIKE PROTECT is also suitable for particularly bad weather conditions as it prevents heavy accumulation of dirt.

Product features

- Care and protection spray
- Also works upside down
- Preserves bikes when they are not being used for long periods
- For painted surfaces as well as chrome and other metals
- Outstanding protection against corrosion thanks to thin oil film
- Protects against dust and dirt
- Carbon tested

Application

Shake before use. Spray BIKE PROTECT BIO onto a microfibre or normal cloth and rub into clean, dry parts. Do not spray on brake discs. To get the bike ready to ride again, clean it as normal with BIKE CLEAN and get it back to its original condition with the other care products and lubricants from MOTOREX. Test on a non-visible area before use to check material compatibility.

Dosage

When using BIKE PROTECT BIO, ensure that all parts such as the frame, fork, drive unit and chrome parts are fully covered with a protective film by spraying a generous amount of BIKE PROTECT BIO onto a microfibre or normal cloth and applying it to the bike.

Important: avoid contact with the tyres, handle grips, saddle and brake discs.

Notes

Biodegradable according to OECD 301 B
