

CHAINLUBE FOR DRY CONDITIONS

SPRAY

Chain lubricant for use in dry conditions

Description

MOTOREX CHAINLUBE FOR DRY CONDITIONS is a biodegradable, fully synthetic chain lubricant with dust- and dirt-repellent properties. It is characterised by good chain adhesion as well as extremely effective corrosion and oxidation protection. Its viscosity results in a good level of chain penetration, enabling precise and smooth shifting, which is important in the fields of mountain biking and downhill mountain biking.

Advantages

- biodegrades quickly
- free of heavy metals
- excellent dirt and dust resistance
- excellent penetration
- good material compatibility
- brilliant adhesion
- effective corrosion and oxidation protection
- first-rate results in races

Field of application

MOTOREX CHAINLUBE FOR DRY CONDITIONS is used to lubricate the chains and derailleurs of all bicycles in dry weather conditions – particularly mountain bikes and downhill bikes.

Application

Apply MOTOREX CHAINLUBE FOR DRY CONDITIONS to the dry chain and derailleur. Move the parts as you do this so that the lubricant is applied evenly. The dirty chain can be cleaned easily using MOTOREX BIKE CHAIN DEGREASER. Particularly in dusty conditions, the chains should be cleaned and re-oiled after each journey to prevent the penetration of dust, sand etc.

Notes

Warning: Avoid contact with the brakes so that the brake action is not impaired. Note: Also available as a liquid!

Technical data

Properties	Unit	Test according to	Values
Colour			light yellow
Density at 20 °C	g/cm ³	ASTM D4052	0.711
Viscosity at 40 °C	mm ² /s	DIN 51562-1	<3
Pourpoint	°C	ASTM D5950	+5
Flash point C.O.C.	°C	DIN EN ISO 2592	82
