3. We hereby declare with full responsibility, that articles mentioned above comply with reference documents mentioned:

REGULATION (EC) No 1935/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directive 80/590 / EEC and 89/109 / EEC.

COMMISSION REGULATION (EC) No 2023 / 2006z on 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

Commission Regulation (EC) No 10/2011 of 14 January 2011 on materials and articles of plastics intended for food contact, as amended,

ACT of 25 August 2006 on food safety and nutrition (Dz. U. 2006 No. 171, item. 1225, art. 53-58).

DIRECTIVE 94/62 / EC of the European Parliament and of the Council of 20 December 1994 on packaging and packaging waste, as amended by Directives 2004/12 / EC of 11 February 2004 2005/20 / EC of 9 March 2005 and 2013/2 / EU of 28 February 2013.

BfR XXXVI "Paper and paperboard intended for contact with food products" dd 1.10.2014

4. Overall and specific migration

Products comply with overall migration limits (OML) – tested as follows:

- 40°C during 10 days (Simulant E: Tenax)

The level of migration does not exceed 10mg/dm³ or 60mg/kg.

5. Heavy metals

According to the Directive of the European Parliament and Council Directive 94/62 / EC of 20 December 1994. the sum of the concentrations of lead, cadmium, mercury and hexavalent chromium does not exceed 100 ppm [mg / kg] weight.

6. Water based ink

On the basis of information received from a supplier of paint used in the manufacture of products are compatible with the list of exclusions EuPIA and are developed and manufactured in accordance with EuPIA "Guidelines for printing inks used on packaging is not in contact with the food product."
Supplier of paints confirms that the products comply with Section A of the Annex to Regulation (EC) No 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.

7. Allowable time and temperature of treatment and storage during the contact with food

The time and temperature range while processing and storage after packaging is associated with the limitations associated with the same resistance packaged foods and remains consistent with the provisions of Regulation (EC) No. 10/2011 on materials and plastic products intended for contact with food, as amended, ie. time and temperature in contact with food (test lasting 10 days at 40 ° C) should be any long-term storage at room of temperature (23 ° C) or less, including heating to 70 ° C for no longer than 2 hours or heating to 100 ° C for no longer than 15 minutes.

8. Application

Our packages are manufactured in compliance with all these rules and are designed for direct contact with food.

The delivered and specified products can be used safely as packaging material for dry, moist and fatty foodstuffs.

9. Restrictions on use

Packages are not suitable for heating food in microwave ovens, both as and baking ovens. Packages are not intended for cooking and high-temperature sterilization. Packages cannot be used as a toy. Packages cannot be eaten. Packaging must not be frozen.

10. The storage conditions

- store in original, sealed and properly labeled containers;
- storage room should be covered to prevent: gets wet, moisture, direct sunlight; storage must protect the product from the effects of the weather;
- packaging film should be stored at least 1.5 meters from the active heating devices;
- storage temperature: 14-25°C; humidity below 75% RH;
- store and use within six months from the date of production.

11. Traceability

Stenqvist Poland Sp. o.o. labels all pallet, rolls and all other packaging units. Order number is indicated on each label. All relevant data are recorded in the order number. Detailed traceability of the raw material, machinery and personnel is possible. All production processes are repeatable and traceability is ensured and documented. Therefore Stenqvist Poland Sp. O.o. meets all the legal requirements for traceability according to the Regulation (EC) No 1935/2004, which came into force in 2006.

This Declaration of Conformity is issued for an indefinite period. It should be restored in case of significant changes in the composition or production, which entail changes in the migration materials and products or when new scientific data become available.

All of the above conditions set out in the provisions of European Union law and the provisions of Polish law have been met.
