

LEITZ® IQ

IQ: Intelligent & Quiet shredders

DESIGNED FOR GROWTH

LEITZ® IQ **INTELLIGENT & QUIET**

INTELLIGENT combination of technology and design:

- Integrated Anti jam technology,
- Next generation motor for increased run times,
- New elegant design for any office space,
- Capacitive touch panel,
- Secure locking system,

QUIET operation:

- Next generation motor for lower noise levels,
- Continuous quiet operation for uninterrupted shredding,

New Touch Control Operation

The new touch control operation uses capacitive buttons for a better user experience.

This also allows for two buttons to be held at the same time to activate the lock feature preventing the shredder from being used without supervision i.e. by children in your home office

This mode can then be unlocked by pressing the same two buttons again.

Ultra Quiet Shredding

Using a new shredder motor we can achieve ultra quiet running shredders with the added benefit of longer run times.

A quieter motor and cutting unit lead to a lower acoustic level for a far quieter working environment.

The new motors will also allow the shredder to run for longer periods for more shredding time.

New Anti Jam Technology

Anti Jam technology with reverse function which reduces paper jams and maintains a high shredding performance/

There is also an indication light to show when the shredder has reversed the paper out.

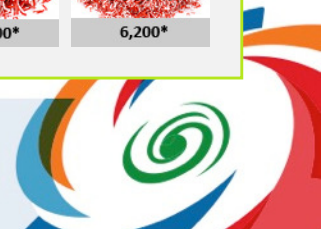

New P5+ and P6+ Cutters

New 2x5mm DIN P5 cutters which add additional security to a P5 machine by cutting one A4 sheet of paper into over 6000pcs rather than the standard 2000pcs offered by other P5 shredders.

New 1x5mm DIN P6 cutters giving added security over a P6 machine, shredding A4 into 12000pcs rather than the standard 6000pcs.

Level P-5 Micro-Cut	Level P-6 Super Micro-Cut
X3 More Secure 2,000*	X2 More Secure 6,200*

LEITZ® IQ
