- ◆ Memory function and multi-modes to satisfy varies riding scenarios.
- ◆ Feathery 0.84 oz, and exquisite house design with IPX6 waterproof rate.
- ◆ USB rechargeable and easy-to-read power indicator.

Brighter—Efficient Energy Consuming

Emits stronger light outputs while consuming less energy with high transparent lighting strap.

More efficient lighting performance comparing to traditional red case tail light.

Safer—Design for Your Safety

SEEMEE 30 lets you be seen from up to 800 meters, and its elegant translucent anti-scratch case, provides 230° high side visibility, to make you more visible at risk moments.

| Smarter —Master Your Way

MAGICSHINE

Ambient light sensor: Sensitive infrared light sensor built in, automatically change the light mode according to environment. Thus to increase warning effect during the day.

Smarter — Concern Your Safety

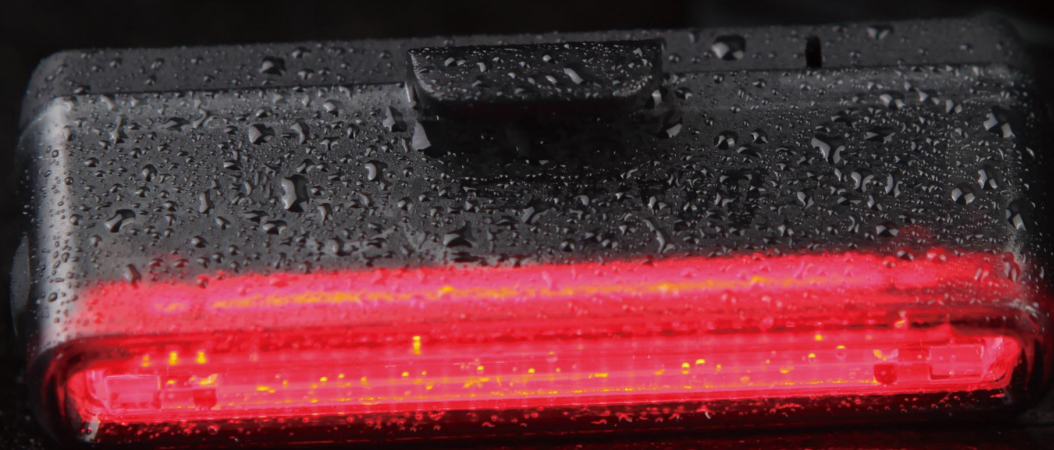

MAGICSHINE

Low power mode: When battery level is lower than 5%, SEEMEE30 automatically changes to economic flash mode, which can run up to 20 minutes before it totally powers off.

This function ideally extends the burning time, and protects riders to go home safely.

IPX6 Waterproof Rate

Storm or wind, SEEMEE 30 will resist the water from anywhere in any challenging environment.

Water proof rate maybe decline over long using time

Convenient USB Charging

Charging Indicator:

Indicator light breathes when charging till fully charged

| Easy-to-Read Power Indicator

At standby mode, click the power button to activate battery indicator for 30s.

Constant: 100%-21%

Flash: 20%-0%

Versatile — Compatible for All

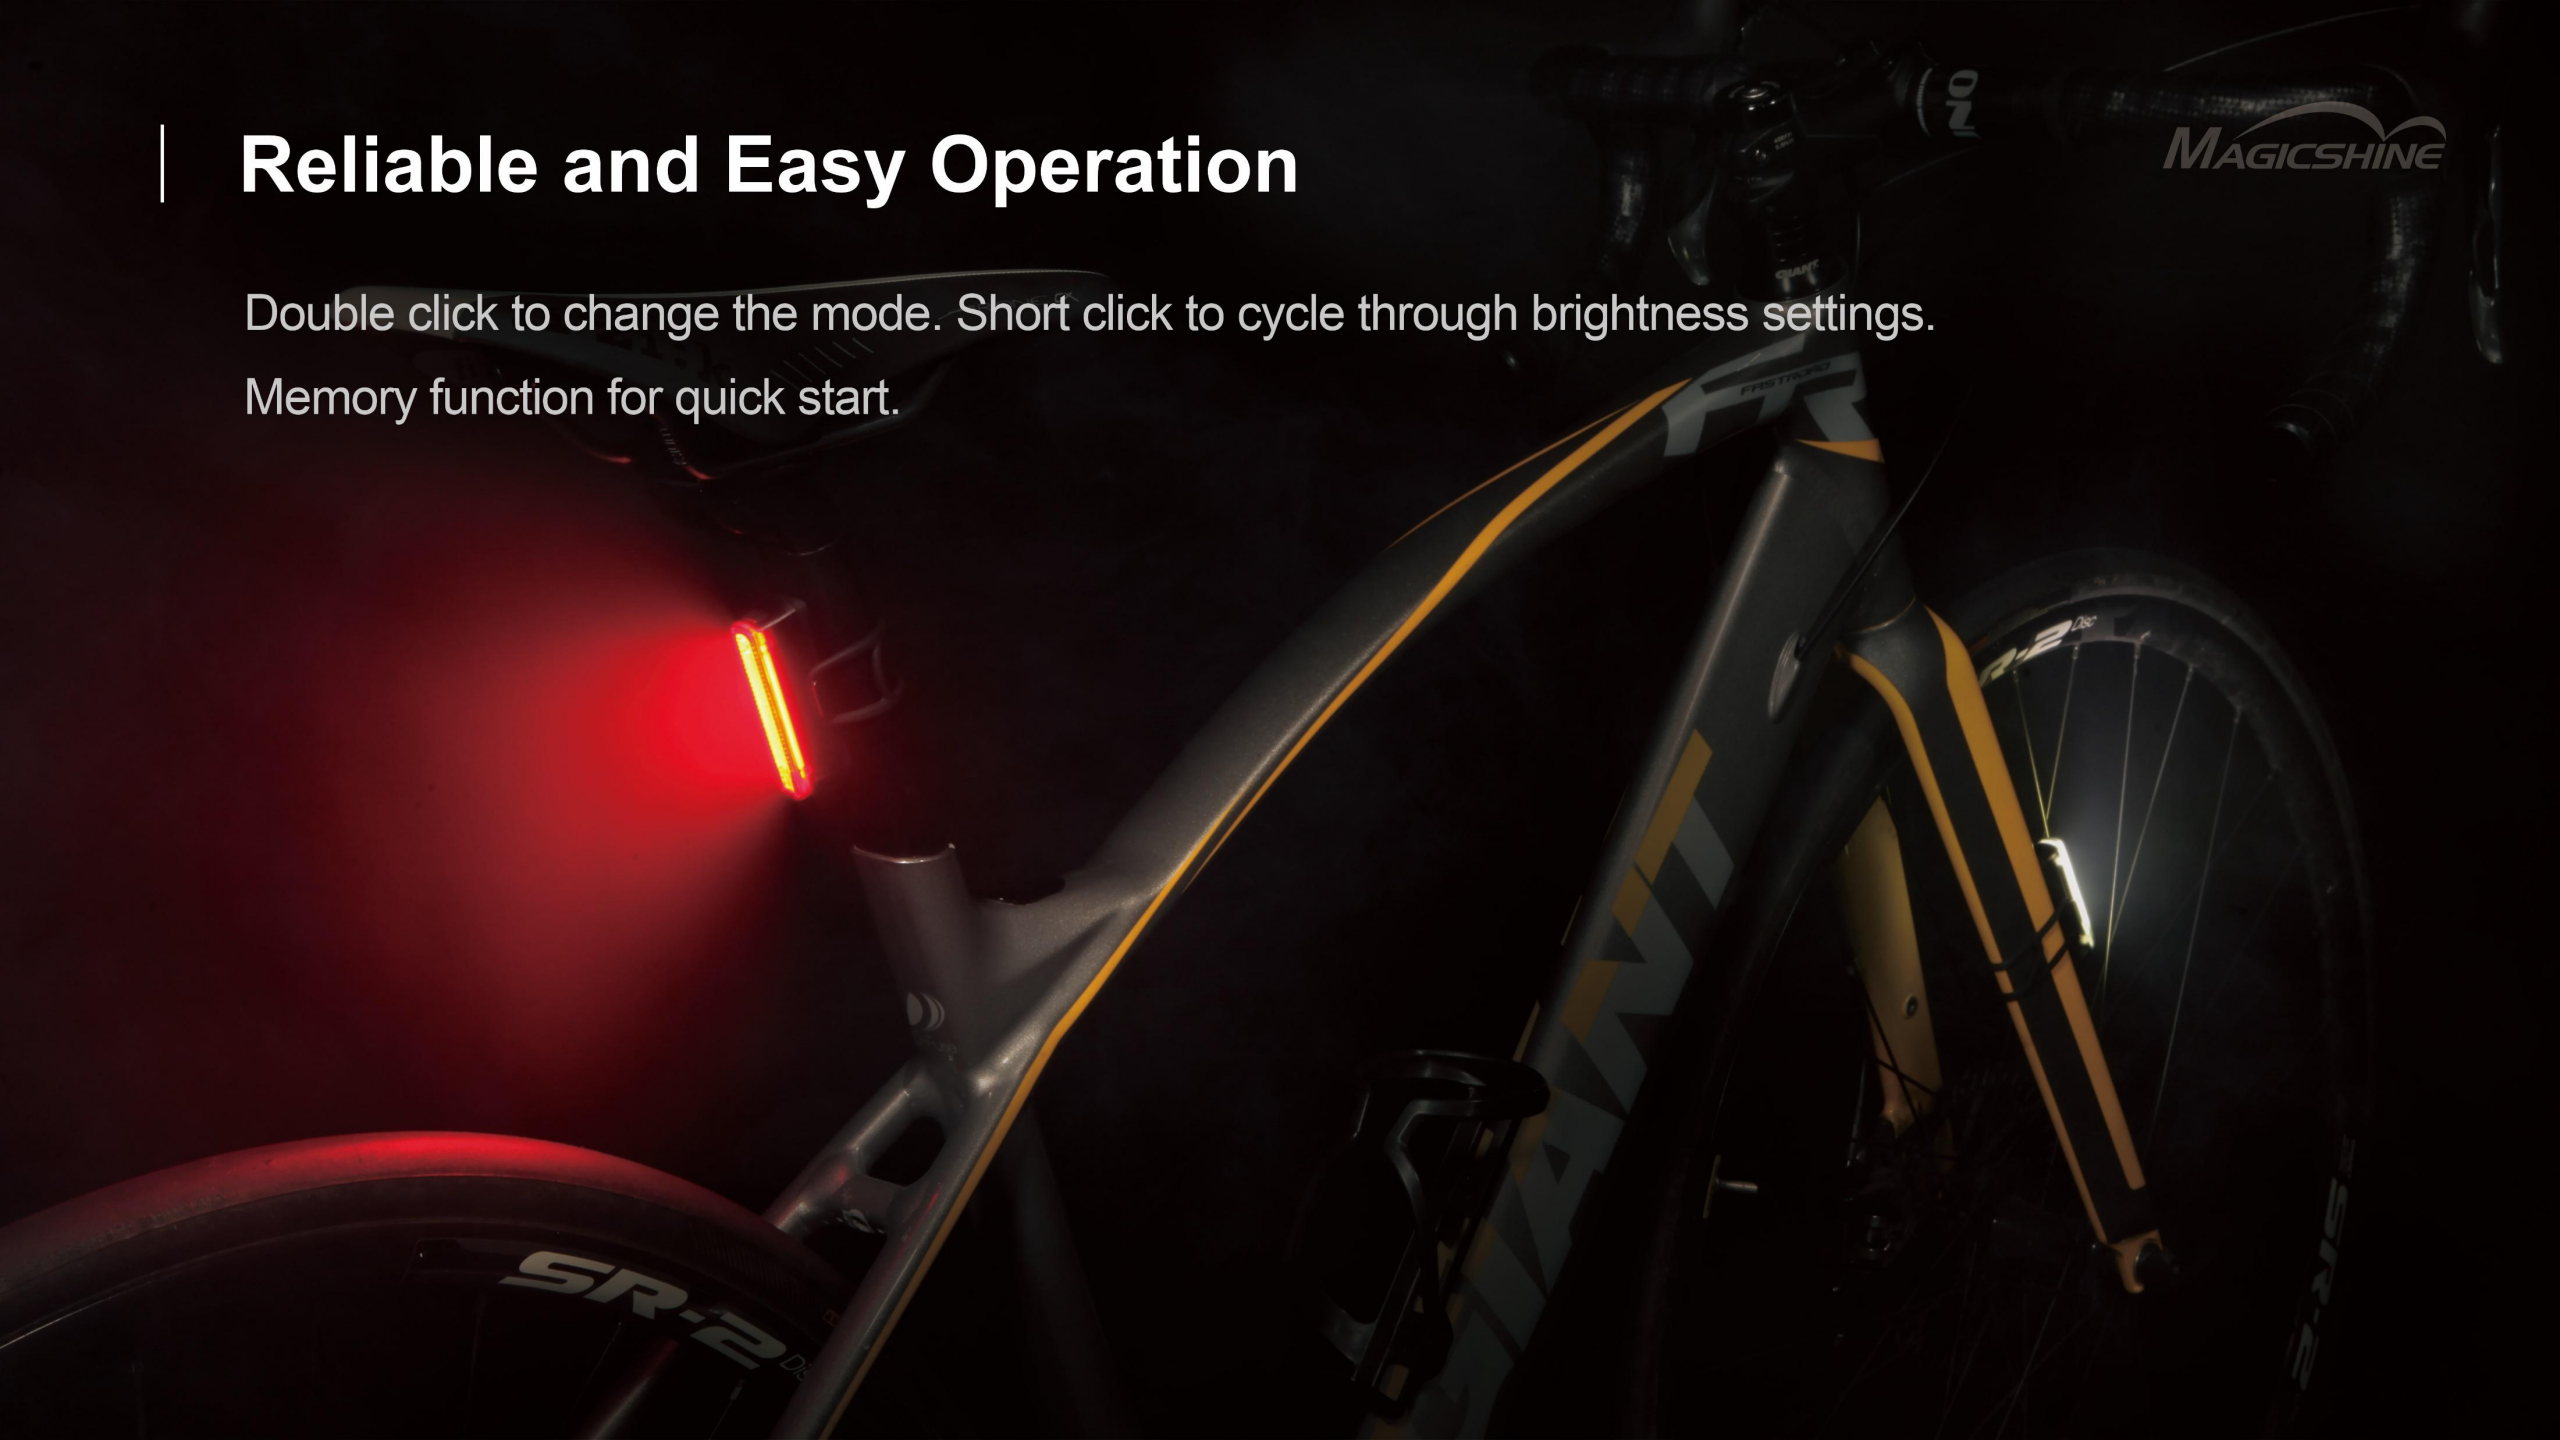

Multiple mounting methods. Solid silicon strap can be mounted safely to different bar shapes conveniently.

Reliable and Easy Operation

Double click to change the mode. Short click to cycle through brightness settings.

Memory function for quick start.

| Memory function and multi-modes to
satisfy different riding scenarios
