

Scotch-Brite™

Melamine Foam.

Technical Data

Date : March 2003
Supersedes: New
Author: B.Pedriza

DESCRIPTION

This product can be defined as a foam pad made out of a white melamine resin. Due to the hardness of the cured melamine resin this foam has a very good cleaning capability. Due to its foamed structure this cleaning tool has a good water absorption as well as flexibility. Due to the fact that melamine is a plastic it is a non scratch cleaning product.

PRODUCT ADVANTAGES

- High Cleaning Efficiency. Easily removes all type of dirtiness.
- Non-scratching. Cleans without damaging the most household surfaces.
- Disposability. This foam is wearing out (desintegrated) over uses.
- Good water absorption capability. It can works dry and wet, and with and

without soaps and chemicals.

- Foamed structured. Soft dirtiness is catched into the foam cells. Continuously rinsing is not essential to maintain initial cleaning capability.

DIRECTION OF USE

- Caution: In case of highly sensible (or delicate) surfaces, such as plastics, paints or varnish surfaces that have gloss, matt or polish finish, try in a hidden or small part before.

LIMITATIONS OF USE

- Do not use on on very soft plastics.
- Do not use wet on distemper wall paint.

WHERE / WHEN TO USE

- Removes stains, dirt, soap scum, lime marks in the bathroom.
- Removes crayon marks and scuff marks from

walls, floors, doors, appliances, etc.

- Gentle enough to surfaces as glass ceramic, non sticky, stainless steel, aluminum, ceramic, melamine (Formica), tiles, wood, chromic, fiberglass.
