

CERTIFICATE

We certify that all plastic and metal products are made in materials approved for food contact and satisfy the requests of the European Community (C.E.E. regulations) for the goods used for foods.

All our products do not contain dangerous elements for the health of people such as toxic elements, micro-toxins and other elements forbidden for usage in the food industry.

For our plastic products we use ABS (Acrylnitril-Butadien-Styrol), PP (Polypropylene), POM (Polyacetal), PE (Polyethylene), SAN (Styrolacrylnitril), PC (Polycarbonate) or PS (Polystyrene).

For our metal products we use stainless steel 18/10, stainless steel 18/8 and stainless steel 18/0 or aluminium ALMG3, or aluminium AL99,5.

Declaration of conformity

Schneider GmbH, In der Längerts 1, 73095 Albershausen

Articles made of metal

Herewith we confirm, that our above-named product range as well as the used materials and raw materials are conform to the requirements EG 1935/2004, the German commodities ordinance and the recommendations of the Federal Institute for Risk Assessment in their respective latest version.

Compliance to the limit / range of applications

The compliance with the specific migration result values under the permissible limits for metals in drinking water according to EG 1881/2006.

The alloy with its fraction of metal is qualify as a food stuff material

The outcome of this is the acceptability for products made of metal for:

- hydrous foodstuff
- fatty foodstuff

Limitation of custody of strongly salty and strongly acetous foodstuff.

There are no objections against the application of the product range as a commodity intended to come in contact with food stuff according to the regulation EG 1935/2004 and the Food and Feed Code § 30 and 31
