

RANGE COMPOSITION

A range of hoods used mainly over appliances where steam is produced. The filter surface situated on the front of the hood traps the vapours given off at the front by ovens, pots, pasta cookers, bratt pans, dishwashers. The rear baffle directs the fumes towards the filter surface, condensing the steam which is then conveyed through the outer ducting into the discharge. The range consists of hoods with 8 different lengths (1200, 1600, 2000, 2400, 2800, 3200, 3600 and 4000 mm) and 1600 mm deep.
